

HJS/TFH Diesel Particulate Filters

Proven Technology High Performance

Protect workers with HJS/TFH DPF - the diesel particulate filter proven effective in a variety of applications.

HJS/TFH filters feature rugged sintered metal elements that operate over extended intervals, are simple and inexpensive to clean, and never need replacement.

High Performance/Low cost of Ownership

Reduces soot particles and fine particulate matter by more than 99%

Reduces NO, and NO₂

Sintered metal elements for long life

Multiple technologies suit a broad range of exhaust gas temperatures

High ash-holding capacity for extended operating intervals

Easy to clean - simply water wash and return to service

Compact installation envelope
